Copyright, Canada, 1951, by Henderson Directories Ltd., 279 Garry St., Winnipeg.

Introductory

The present volume for 1951 is the 23rd edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social, and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION

THE DEPARTMENT OF MISCELLANEOUS INFORMATION starting at page 7 contains information about Civic History and Industry, as well as a complete list of Apartment and Business Blocks.

THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE starting on page 19 features the names of all streets and avenues arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

Δ Denotes that there is a Telephone in the house.

◆ Denotes that someone living in the house is the owner.

THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens and their wives, business firms and corporations starts on page 77.

THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED BUSINESS DIRECTORY, at the back of the book, exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry or profession followed.

LETHBRIDGE POPULATION, in excess of 22,000

The Directory estimate of population is based on the actual number of individual's names in the Alphabetical section of the Directory, with due allowance for children and for women whose names are not listed. The Lethbridge Directory covers considerable territory beyond, but tributary to the city limits, which is canvassed in order that the names of all people employed or who purchase in Lethbridge may be obtained.

ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully,

The Publishers,

HENDERSON DIRECTORIES LIMITED.

June, 1951.

Lethbridge

(By courtesy of the Lethbridge Chamber of Commerce)

LOCATION

Lethbridge is a divisional point on the Crow's Nest Pass line of the Canadian Pacific Railway to Vancouver, 125 air miles southeast of Calgary, 475 air miles east of Vancouver and 700 air miles from Winnipeg. It is on the Oldman River immediately above the site of Coal Banks, where Nicholas Sheran, Alberta's first miner started working on coal facings in 1872. This name was changed in 1885 in honor of William Lethbridge, first president of the North-Western Coal and Navigation Company, which company developed the coal properties at Coal Banks. This exploitation was carried out upon the recommendation of Elliott T. Galt, son of Sir Alexander Galt, one of the fathers of Confederation, and the name of Galt has been associated with the city ever since.

PROGRESS

Lethbridge achieved the dignity of a town in 1891, its first mayor being C. A. Magrath, who was also the first president of the Lethbridge Board of Trade. The town received its city charter in 1906, with a commission form of government being inaugurated in 1914. This was continued until 1928, at which time the managerial form of civic government was instituted and it is still in force.

MUNICIPAL GOVERNMENT

The city council is elected by the popular vote of eligible voters, the mayor being chosen from the councillors at the first meeting of the new council each year. The public and private school boards are also elected by popular vote.

Municipal Ownership:

The city owns its own power, waterworks and filtration systems, and a modern sewage disposal plant. It also operates the local bus transit system.

Other Facilities:

The city and district is also served by natural gas and has more than ample coal supplies. Electricity is available at reasonable rates, supplied by the municipal power plant.

Communication is provided by the lines of the Alberta Government Telephones, whose Southern Alberta headquarters are in Lethbridge.

General Statistics for 1950:

Population (estimated)	22,000
Elevation (approximate)	2,983 feet
Area	6,440 acres
Postal Revenue	\$ 212,359.96
Mill Rate	50
Land Assessment	100%
Improvements	66%
Gross Funded Debt	\$ 1,852,080.68
Net Debt	\$ 2,146,916.91
Tax Levy	\$ 1,100,345.15
Bank Clearings	\$158,342,846.00
Building Permits	\$ 4,479,525.00

AGRICULTURE

Wheat:

South Alberta's wheat crop this year was just under average. The main reason for this was the poor precipitation . . . the crop was grown with 3.77 inches less rain than average, with only 4.15 inches of rain during the critical months of May, June, and July against an average of 6.82 inches. Two inches of additional rain in May, June, and July can often be the difference between a fair crop and a bumper one. Wheat in the Lethbridge railway division this year averaged about 16½ bushels per acre against the long-time average of 17 bushels. But, except in a few cases, it made up in quality what it lacked in quantity. Figures from grading stations indicate that some 82% of the South Alberta bread grain crop

was in Grades 1, 2, and 3, the contract grades, so brought the top price. The West as a whole produced only 40 per cent top grades. The result is that South Alberta farmers, though they are getting only \$1.40 per bushel initial payment basis Fort William No. 1 wheat, should in the end, draw a rather attractive participation certificate payment in the fall of 1951 after the crop has all been sold. This is the first year that Canada's wheat has been sold under the international Wheat Agreement which sets the price between a minimum of \$1.40 and a maximum of \$1.80, American funds.

Coarse Grains:

Coarse grains do not enter largely into the Southern Alberta commercial picture, for the reason that probably not more than 20 per cent of it is ever sold into regular commercial elevator channels. Most of it is fed on farms, especially in the big cattle and lamb feedlots in irrigated areas. Coarse grains were a fair average crop in 1950 with 6,480,000 bushels of oats and 7,870,000 bushels of barley.

Dairying:

The fluid milk purchased by distributing plants at Lethbridge was 7,088,846 pounds as compared to 6,730,570 in 1949—an increase of 5.2%. The creamery butter manufactured in Census Division No. 2 was 1,102,601 pounds—a decrease of 12% from the 1,253,645 manufactured in 1949. Cheese manufacture too, showed a decrease of 18 per cent.

The Dominion Experimental Station:

Located just east of the city, was established in 1906 and has been a major factor in the agricultural development of Southern Alberta. The work of the Station has been greatly expanded in recent years to meet the demands for information on a diversity of problems. The Station now comprises about 1,100 acres on which investigations in both irrigated and dry land farming are conducted. Laboratories for cereal breeding, forage crops, wool research, and animal nutrition are in operation. A Plant Processing and Sugar Beet Laboratory has been built and is being equipped and staffed. In 1950, steps were initiated to increase the facilities of livestock investigations. Feeding sheds for sheep and beef cattle were completed. A loose housing barn and a conventional barn were constructed to permit a comparison of these two methods of housing livestock.

IRRIGATION

Irrigation farming has played an important part in the development of the city and the surrounding district during the past 25 years. Through it has developed a sugar beet and a vegetable canning industry, both of which are thriving. Beef and sheep feeding products have grown tremendously as a result of the availability of sugar beet by-products, and each year many thousands head of cattle and lambs are maintained and finished on wet beet pulp and betalasses.

St. Mary-Milk Rivers Development:

Commencement of work on this irrigation project in 1946 marked the beginning of a new era for the Lethbridge district. Now, the diversion tunnel has been finished and work almost completed on the construction of the St. Mary Dam, largest of units in this project which will more than double the amount of land already under irrigation. The irrigation tunnel, the spillway and the main canal are well on the way to completion. The entire program is expected to cost between \$15 and \$20 million dollars and is being financed jointly by the provincial and dominion governments. Its completion will mean increased opportunities for agricultural and industrial expansion, more people on the land, more wealth produced.

DOMINION SCIENCE SERVICE LABORATORY

Science Service Laboratories are a new venture in the agricultural research programme of the Dominion Department of Agriculture, and the new establishment at Lethbridge is one of the first of its kind to be built in Canada. The combined efforts of various agricultural specialists including entomologists, pathologists, physiologists, chemists and plant breeders will be co-ordinated toward the solution of problems affecting agriculture on the prairies.

INDUSTRY

Mining:

Coal was the prime reason for the settlement of Lethbridge, and it still plays an important part in its economy, there being over 600 miners employed in the mines at and near Lethbridge. It is estimated that there is a reserve of two billion tons in the deposits underneath Lethbridge, and the future use of these reserves is becoming a matter of concern to the mining industry as well as to those who realize to what extent coal is connected to the welfare of this district. It is to be hoped that extensive developments will be seen in the utilization of coal through processing into plastics and more efficient fuels, for which purpose Lethbridge coal is ideal.

OIL AND GAS

Oil:

The year 1950 brought important developments in the oil and gas industry in Southern Alberta. Highlighting news from the field was commercial crude oil strikes at Barons and Spring Coulee-Del Bonita areas. These discoveries are serving to strengthen the interest of operators in the southern plains and 1951 is expected to see a big play in this end of the province. The Pincher Creek wet gas field received further confirmation as a vast gas reserve during the year—a special test of the Gulf-Walter Marr well showing a recovery of 150 barrels of 51 gravity oil a day from 4,000,000 cubic feet of gas run through the flow pipe. This "wonder well" had an open flow production of 83,000,000 cubic feet of gas per day. A fourth Pincher Creek Well was started during 1950 was not completed.

Natural Gas:

During the year 1950, Lethbridge and district saw considerable expansion in the natural gas industry. Extensions were made in many sections of the distribution plants and 820 customers were added to the line. The metered consumption of gas for the year was 3,511,611 McF.

COMMERCIAL

Lethbridge is one of the best trading centres in Canada, it ranking 25th in general merchandise sales in the last Dominion census figures. The wealth production in 1950 in the Lethbridge division of the C.P.R. was \$122,675,000. There is a potential market of an estimated 150,000 people in the wholesale trading area, and in that served by retail merchants there are 100,000.

TRANSPORTATION

Lethbridge is the divisional headquarters of the Lethbridge division of the Canadian Pacific Railway Company, with direct connections to Vancouver. It also connects with the main line at Calgary and Medicine Hat, and is a focal point for other localities north and south. The Greyhound Bus Lines offer a similar service which is supplemented by the smaller bus companies. Lethbridge is also serviced by the Trans-Canada Airlines with north connections to Calgary, Edmonton, and Alaska, while the Western Airlines supplies a service to Great Falls, Salt Lake City and Los Angeles.

MISCELLANEOUS

The Lethbridge Chamber of Commerce:

The Lethbridge Chamber of Commerce was organized in 1889, with C. A. Magrath as its first president, and it has always played a leading part in city's progress. Information on questions relating to the city and district is available at all times through the office on the mezzanine floor of the Marquis Hotel.

There is also a very active Junior Chamber of Commerce which was organized in 1945. It participates in many projects of a community nature, an outstanding example of which is the fine film projection service which it operates in co-operation with the Lethbridge Public Library, making available to all community organizations a varied program of films. It also has a plan of self development for its membership which is exemplified in its public speaking training classes which have been acclaimed best amongst junior chambers of Alberta.

Parks and Recreational Facilities:

There are ample opportunities for recreation in the city owned 200 acres of parks, which are adapted for various purposes. The outstanding attractions are Galt Gardens, in the heart of the city, and Henderson Park, which has a lake, wading pool, and dance pavilion, as well as playground equipment. There are also three ball parks, two golf courses, a soccer field, an artificial ice arena, a sports centre and a curling rink. Dedicated in 1948 was the new open-air swimming pool, which was built through the efforts of the Lion's Club. In addition to these facilities, the local service clubs operate various playgrounds for summer and winter sports, such as tennis, fast ball and ice skating. They are also well outfitted with playground equipment and wading pools.

The Y.M.C.A. carries on its fine tradition, in Lethbridge as elsewhere, providing recreation and cultural opportunities. In Galt Gardens is located the Gurney Museum which contains many historical relics and fine specimens of wild life.

Two Public Servants:

Lethbridge is well served by two public servants, the Lethbridge Herald and Radio Station C.J.O.C. The paper was first published as a weekly in 1905, and, in 1947, celebrated its 40th anniversary as a daily. It has always been a champion for any cause which benefitted Lethbridge and the province of Alberta. Radio Station C.J.O.C. first went on the air in 1926, moving to its present location atop the Marquis Hotel in 1928. In 1947 it increased its power to 5,000 watts on the occasion of its 21st year of operation, and is now able to give the utmost in service to its wide audience of listeners.

CIVIC CENTRE

Proof of the faith of the citizens of Lethbridge in the future is shown by the setting aside of a four-block area in the heart of the city for a Civic Centre. The first building erected was the \$250,000 City Hall. This was followed during 1949 by the Fritz Sick Memorial Swimming Pool and Sports Centre. Part of the cost of this building was paid for by \$100,000 donated by Mr. Fritz Sick, a late resident of this city. The balance of \$250,000 was borne by the city. Future plans call for a hockey, skating and curling rink as well as grounds for football, baseball and tennis. A new Provincial Government Court House building is being erected in the Civic Centre. These three civic buildings have all been paid for and there is no bonded debt.

Educational Information

LETHBRIDGE PUBLIC SCHOOL TRUSTEES

Elected at large. Meets every second and fourth Thursdays in Board Room, Junior High School, 15th Street South and Fourth Ave.
Superintendent and Secretary-Treasurer—A. J. Watson, B.A.
Office—Junior High School, Phone 3548.

Bowman School Annex of Central School

Common Sense

About City Directory Circulation

THE TRUE VALUE of advertising circulation is circulation consulted.

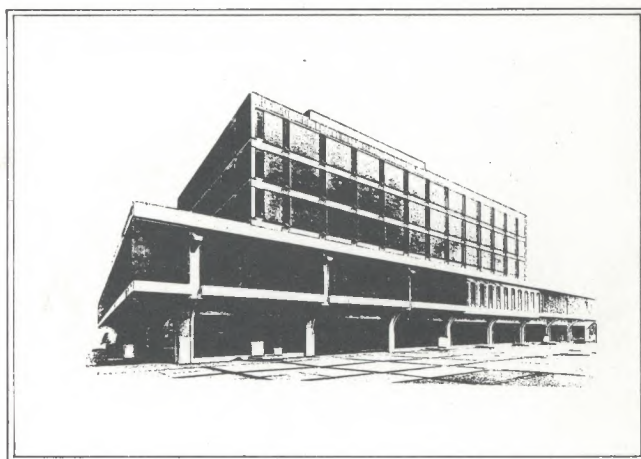

TO BE EXACT—by actual survey in Canadian cities—for each City Directory, an average of three and one-half consultations were made for each business day.

TO BE CONSERVATIVE we will eliminate the sixty Sundays and Holidays when no tests were made.

FOR EVERY THOUSAND DIRECTORIES sold there will be an average of three and one-half daily consultations for each book for three hundred and five days, therefore—

$$1000 \times 3\frac{1}{2} \times 305 =$$
$$1,067,500$$
